White Paper NEKOXAU

🐾 Introduction

NEKOXAU wasn't made for hype. It was born from conviction — in the body of a golden cat.

In a world full of FOMO and scams, NEKOXAU stands for extreme patience, unshakable belief, and digital legacy.

🐱 Narrative

This cat is not just a meme. It's a digital legacy in the body of a cat. It doesn't sell. It doesn't chase hype. It waits. Builds. Watches.

NEKOXAU is a symbol of radical patience and eternal conviction. It does not chase numbers — it chases meaning. It doesn't seek fast riches — it builds something time can't destroy.

🌅 Vision

To become the true symbol of the crypto world — born not from hype, but from belief. We don't chase market cap.

We're here to prove "What seems absurd may become eternal. And those who wait may inherit the world."

🎯 Mission

Build a true holder community, not panic sellers.

Make NEKOXAU a symbol of meaningful wealth.

Lead through legacy, not trend.

Represent digital resilience.

Turn a meme into gold: community, value, belief.

The NEKOXAU smart contract is fully verified on Etherscan and uses the trusted OpenZeppelin ERC20 standard. It has a fixed total supply of 21,000,000 tokens and does not include any mint or owner privileges.

This contract was compiled using Solidity ^0.8.20, which may trigger a minor compiler warning on Etherscan. These warnings are known low-severity issues unrelated to NEKOXAU's functionality or security. Since the token uses standard ERC20 logic, there is no impact on safety or performance. This contract will remain the official and permanent version of NEKOXAU unless an upgraded version is needed in the future.
